In 1997, Thermovision decided to invest in a new technology that would enable it to establish itself as the leading manufacturer of high-end thermoplastic furniture doors, accessories and components.

- POLYMÈRE collection offering a complete range of models offering several styles in a wide selection of colors;
- POLYESTER collection offering an unmistakable look to real wooden doors;
- High gloss collection;
- Accessories collection.

All their products have zero formaldehyde emissions and pass CARB phase 2 level.
